SUBJECT Use of Glass Mines by Andartes

INFO. [REDACTED]

25X1A6a

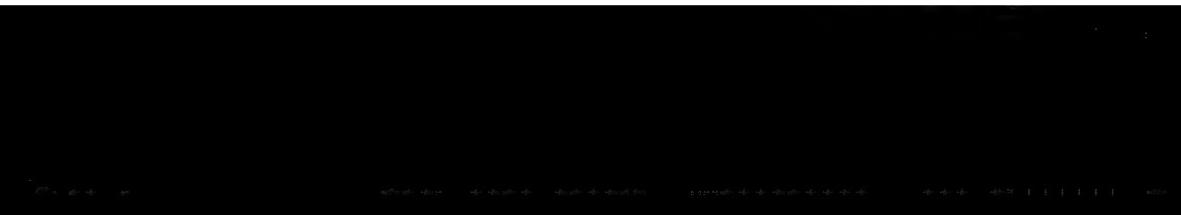

DIST. 18 March 1947

ORIGIN [REDACTED]

PAGES

SUPPLEMENT

25X1X6

1. 25X1X6 [REDACTED] the Andartes have been using glass mines which defy detection by mine detectors. A number of such mines, believed to be of Russian manufacture, were discovered north of Larissa during the latter part of January. The mines were said to be modeled after those made by Germany during the last stages of World War II.

2. The captain of a Mine Detecting Squad discovered the mines after a careful watch following numerous deaths. An Andarte posing as a farmer was caught planting them in the road. The latter stated he was paid a certain amount for each mine he planted in the roadway.

This document is hereby regraded to CONFIDENTIAL in accordance with the letter of 15 October 1978 from the Director of Central Intelligence to the Archivist of the United States.
